Ergonomic carrying options for Maxi & Mini

Slide belt

With the slide belt around your waist, you can always have your Maxi or Mini transmitter with you. The transmitter is hooked in the slide belt clips. The belt is easy to adjust for a perfect fit. The transmitter can easily be slid around the waist, or all the way to the back. In this way the transmitter is out of the way when you do not need it, and there as soon as you need it again.

Size: One size.
Part no. 48062

Shoulder hook

The shoulder hook makes it easy for you to bring the transmitter with you. The shoulder hook is easy to take off, and easy to put on. It is ergonomically focused on relieving your back from strain. The shoulder hook is adaptable in length for a perfect fit. The upper and lower part can be disassembled quickly for convenient storage. It is comfortable to wear on both long and short working days.

Size: One size.
Part no. 48061

Shoulder Vest

The shoulder vest (harness) is especially designed for long working days. The weight of the transmitter is evenly distributed over both shoulders and relieves you from any stress. The back is well padded and the straps are adjustable for a perfect fit.

Size: One size.
Part no. 48060

Vest

The vest is especially designed for long working days. The weight of the transmitter is evenly distributed over both shoulders, upper body and relieves you from any stress. The vest is made of neon colored net woven polyester fabric for working f.ex. in traffic environment. The vest is well padded and the straps with clips are adjustable for a perfect fit.

Size: One size.
